+1

PHP Version: 5.6.10  
TYPO3 7.6.6

#### #2 - 2016-06-09 16:41 - BENCH Artwork

any news or patch for this?

#### #3 - 2016-06-13 11:30 - Bas van Beek

Did you guys tried this:

Multishop is working on the latest PHP 5.6. But you need to suppress the deprecation errors. You can do this by adding the following configuration to the php.ini file (.htaccess won't work):  
error\_reporting = E\_ALL & ~E\_DEPRECATED & ~E\_STRICT

Also make sure to configure TYPO3 to "production" mode.

We use Multishop with PHP 5.6.13 without troubles, but only after doing this php.ini change.

#### #4 - 2016-06-14 15:19 - BENCH Artwork

the php.ini setting didn't helped out on production server. But with following settings in TYPO3 it works:

```
'systemLogLevel' => '4',  
'systemLog' => '',  
'errorHandlerErrors' => '20480',  
'exceptionalErrors' => '20480',  
'syslogErrorReporting' => '20480',  
'belogErrorReporting' => '20480',
```

thx to Bas for the hint!
