#### Description

Fluid allows the usage of interceptors, like the escape interceptor. We should add the possibility to allow the registration of interceptors in the core.

[FEATURE] Add Fluid interceptor registration

In Fluid Standalone it is possible to register interceptors to manipulate the template output on different events. The core should offer a way to register own interceptor classes. This patch introduces a way to register classes in `TYPO3_CONF_VARS[fluid]` which are added to the Fluid Parser Configuration.

Resolves: #76107

Releases: master
