<b>Description</b>			
Hello All!			
In the version 8.1, if I select in the Install tool "I do not use MySQL", I get the exception			
#1166546734: Package "adodb" is not available. Please check if the package exists and that the package key is correct (package keys are case sensitive). (More information)			
TYPO3\CMS\Core\Package\Exception\UnknownPackageException thrown in file C:\projects\typo3eight1\typo3\sysex\core\Classes\Package\PackageManager.php in line 508.			
I use XAMPP v3.2.2 with PHP 7.0.4 In include_path stands the path include_path=".;C:\xampp\php\pear"

### History

#### #1 - 2016-05-13 16:08 - Frank Naegler

- Status changed from New to Accepted
- Is Regression changed from No to Yes

confirmed with current master, thanks for your report.

I suggest it is related to the doctrine patch. We will investigate the issue.

#### #2 - 2016-05-13 16:13 - Frank Naegler

\TYPO3\CMS\Install\Controller\Action\Step\DatabaseConnect::executeLoadDbalExtension tries to load EXT:adodb and EXT:dbal which not work and produce the exception.  
No idea yet why it happens.

#### #3 - 2016-05-20 18:02 - Morton Jonuschat

This is caused by commit 077d5d9071df5f0b5df7217e2402b0eebe4017dd for issue [#73041](#)

#### #4 - 2016-09-03 17:17 - Morton Jonuschat

- Category set to Install Tool
- Status changed from Accepted to Closed

dbal/adodb have been removed from the core - this problem does not occur anymore. The selection of the database in the install tool will be rewritten to provide the option to select alternative database next.
