[BUGFIX] Respect columnsOverrides in TCA for suggest wizard

These changes in the SuggestWizardController allow users to override allowed tables in group fields with columnsOverrides.

Typical usecases for this is to use the records field for tt_content elements.

We again hit this limitation in another project for current CMS v 8.7.20. Looks like the JavaScript needs adjustment, to provide the current Type (CType in case of tt_content). This way the suggest wizard can either simulate the data to use the existing FormDataProvider TcaColumnsOverrides, or can look up any overrides itself, which would lead to duplicate knowledge about structure.

Otherwise the type can be fetched from DB, in assumption that the record was already saved.
