[!!!][TASK] Remove legacy soft references functionality

The soft references based on TSconfig, TStemplate and images within fileadmin/ are not accurate and thus useless since it's not common anymore to reference TSconfig or TStemplate code inline inside the DB fields, and also the data inside the softrefparser hasn't been used anymore.

In order to refactor the SoftReference Index the old legacy code is removed first without substitution.

The following softref keys are not evaluated anymore:

- TSconfig
- TStemplate

and can be removed from TCA.

The "image" soft reference key is not evaluating files within fileadmin/ anymore (that are not linked as files).

The "typolink" and "typolink_tag" soft reference parsers don't evaluate links to plain files within fileadmin/ anymore.

The public property "SoftReferenceIndex::\$fileAdminDir" is removed.

The following PHP methods are removed without substitution:

- SoftReferenceIndex::findRef_TStemplate()
- SoftReferenceIndex::findRef_TSconfig()
- SoftReferenceIndex::fileadminReferences()

Resolves: #77156

Releases: master
