[FEATURE] Allow additional paths for extension icons

Until now, the extension icon had to be located under ext_icon.png, ext_icon.svg, ext_icon.gif within the extension directory.

In order to prepare a way to allow only files under Resources/Public/ to be public, the icon can now also be put under Resources/Public/Icons/Extension.png or .svg

Several paths where hard-coded extension icon paths are replaced with the getExtensionIcon() API in the Core.

Resolves: #77349

Releases: master

Change-Id: Ib273f347498d412530ca256a083d896d168f65fa
