##### Revision b576ef96 - 2017-05-22 12:16 - Thomas Hohn

[TASK] Cache results in doesRecordExist\_pageLookup

Copying big sub-trees can benefit from caching the calls to doesRecordExist\_pageLookup in a run-time cache since there are a lot of identical calls to the database.

In addition the signature was adjusted - see also the already merged issue #77391 which altered the signature.
