Initian import / allow_url_fopen

2016-08-21 13:21 - Sven Burkert

Status:	New	Start date:	2016-08-21
Priority:	Should have	Due date:	
Assignee:		% Done:	0%
Category:	Wurfl	Estimated time:	0.00 hour
Target version:		PHP Version:	
TYPO3 Version:	6.2		
Description			
<p>The initial import stops without a note, what was going wrong, with PHP setting allow_url_fopen=0 That's because of this line:</p> <pre>@file_get_contents(\$this->download_url)</pre> <p>in file Library/wurfl-dbapi-1.4.4.0/TeraWurflUtils/TeraWurflUpdater.php</p> <p>Perhaps you could check for this PHP setting in the Backend Module and, if the setting is turned off, you could show a warning.</p>
