##### Revision a2e27d57 - 2017-07-31 09:20 - Benjamin Kott

[FEATURE] Introduce device presets and redesign the view module

The view module was redesigned to provide a more modern and streamlined look and feel across the existing backend. With the introduction of named and categorized device presets we enable users to get a better idea of how the page will look like on a specific device. For even more easy testing, the orientation can now be changed without selecting a different device.
