Description			
Would be great to have an option to save current CE and open a copy of that content element with one button.

[FEATURE] Add duplicate button

This patch provides a new "duplicate" button inside of the topbar of the edit record form next to the close button. This button creates and opens a new copy of the current element which is positioned right below the existing one.

If there are unsaved changes in the currently open record, a modal appears with options to cancel, dismiss the changes and clone or save the changes and clone the changed record.
