<b>Description</b>			
It's not possible to index external files when their path is longer than 255 characters long.			
This happens because the field <code>index_phash.data_filename</code> is only a <code>varchar(255)</code> . It would be good to increase the size of this field.			
Bug appears in TYPO3 6.2.27, but the size of the field hasn't changed in 7.6 or 8, so I believe the bug will be present there as well.

[BUGFIX] Change Indexed Search `index_phash.data_filename` column length

Make database field `index_phash.data_filename` longer, because `varchar(255)` was not enough for some URLs.

Resolves: #77970

Releases: master, 7.6
