<b>TYPO3 Version:</b>	7		
<b>Description</b>			
the list plugin has checkboxes, whether to show the abstract or the keywords of a publication or not, but it is shown always, no matter if checkboxes are checked or not			

#### History

##### #1 - 2016-11-22 16:25 - Maximilian Winck

Hello,

I found that this occurs due to a missing check in the preparePublicationData function in class.tx\_bib\_pi1.php

The check used to be there but was removed some time ago for unknown reasons..  
Edit: It was commented-out in [this commit](#) (see [here](#)) and removed some time later.

To fix the problem for the current version 1.6.1 from TER just add back this

```
// Check restrictions
if ($this->checkFieldRestriction('ref', $referenceField, $val)) {
    $publicationData[$referenceField] = '';
    continue;
}
```

in class.tx\_bib\_pi1.php at line 2664, before "// Treat some fields".

I might create a pull request soon.

Cheers

##### #2 - 2016-12-22 23:13 - Georg Kühnberger

I can confirm that the patch is working, in that

a) in the default List-View with enabled navi\_pref, abstracts and keywords are NOT shown in the result-list (expected result).  
Without this patch abstracts and keywords are always show, disregard the defaults and user-selection.

b) User selecting show\_abstracts and/or show\_keywords  
results as expected, showing the result-list with those elements.

Klaus, Maximilian, Thanks.

@subugoe, please integrate the pull request see:  
<https://github.com/subugoe/typo3-bib/pulls>

Thanks G
