### History

#### #1 - 2016-10-29 13:36 - Nicole Cordes

- Status changed from New to Needs Feedback

Hi Georg,

I'm not able to reproduce your errors on my Windows system with FF 42 nor with current version of Chrome. Can you give some more information about your system? Thank you!

Without the patch I am getting the error Uncaught TypeError: TYPO3.Backend.NavigationContainer.PageTree.select is not a function after applying the patch, the error is gone and above the page tree, the click icon is shown as well again.

## 2] Removing the tree mount does not bring the full tree back!

In Addition two screenshots, the first one showing a blue close button.

Klicking the button and the button is gone. Nothing else happens.

## 4] The automatic reload on form save and the reload button of the page tree don't work any more.

### Reproduce:

Changing the page name by the form doesn't show the changed name in the tree.  
Clicking the reload button doesn't work either.

### Hint

You reset the page tree by logging out and in again.

This issue is still present on latest master (9.0.0-dev) I obtained the javacript error:

To reset the tree, it seems it is sufficient to refresh the browser AFAICS.
