TYPO3 Core - Bug #78479

FAL field (in flexform) with minitems=1 and maxitems=1 has no possibility to add image after deleting the previous one

Description

Hi,
I've noticed a strange behavior when using File Abstraction Layer and set the maxitems. For example something like this:

```
<minitems>1</minitems>
<maxitems>1</maxitems>
```

There is no possibility to change the images later on because the "Add image" Button is missing (when the max allowed imagese are reached). If I delete an image there is still no button and therefore no change to add a new image.

Please see images attached for better understanding.

TYPO3 7.6.11
DCE 1.3.7

Thanks a lot!

History

#1 - 2017-01-02 00:08 - Armin Vieweg

You are right this is a bug. But not in DCE, in TYPO3's form engine. It still occures in TYPO3 8.5. I remember that I've reported this bug 1-1,5 years ago and it was fixed... Had this case min=1/max=1 too. However, I move this issue to TYPO3 issue tracker. Thanks for reporting.

#2 - 2017-01-02 00:09 - Armin Vieweg

- Project changed from 2185 to TYPO3 Core

- Subject changed from File Abstraction Layer with maxitems - Add image Button missing to FAL field (in flexform) with minitems=1 and maxitems=1 has no possibility to add image after deleting the previous one

- Category set to FormEngine aka TCEforms

- TYPO3 Version changed from 7 to 8

- PHP Version set to 7.0

- Is Regression set to No

#3 - 2017-01-10 17:28 - Armin Vieweg

- Is Regression changed from No to Yes

#4 - 2017-01-10 17:29 - Armin Vieweg

This issue has already been fixed ([#72294](#)) and occures again.

#5 - 2018-06-15 23:25 - Riccardo De Contardi

- Related to Bug #77972: Missing upload buttons in inline field added

#6 - 2020-09-23 10:41 - Christian Buelter

- Related to Bug #92381: Button "Create new" does not re-appear for inline (IRRE) elements after reaching maxitems and removing one element added

#7 - 2020-09-23 19:29 - Oliver Bartsch

- Status changed from New to Closed

Hi, this is fixed with [#91808](#). I will therefore close this issue. If you think there is still something not working, please let me know and I will re-open the ticket.

#8 - 2020-09-23 19:30 - Oliver Bartsch

- Related to Bug #91808: Nested IRRE with maxitems hides last inline control button / toggles inline control buttons wrong added

#9 - 2021-01-20 13:52 - Joachim Eckerlin

- TYPO3 Version changed from 8 to 10

- PHP Version changed from 7.0 to 7.3

Unfortunately I have to reopen this issue. It just happened again on a few projects, where the editor was not able to change the image, because the buttons did not reappear after deleting the old image.
because of minitems = 1 you are also not able to save to get the buttons back. So the only possibility to change the image is to delete the whole content element and create a new one with another image.
We solved it right now by setting minitems = 0 and telling the editors to please always add an image, but that is not the solution we would like to have ;)

#10 - 2021-02-25 20:55 - Jan Kornblum

I can confirm this is fixed in 10.4.13 with [#91808](#) . Just testet.
