Description

Ke Questionnaire version 3.1.5

When I need to export the CSF with UTF-8 Chars, the .csv file should contain a so called "BOM" at the beginning. as it actually has not, the result in Excel is a mess.

Solution:

open file:

typo3conf/ext/ke_questionnaire/Classes/Controller/ExportController.php

Search for (exist 3 times) :

```
header("content-type: application/csv-tab-delimited-table;");
```

and replace it in the funtions you need with:

```
if( strtolower($encoding) == "utf-8" ) {  
$csvdata = pack("CCC", 0xef, 0xbb, 0xbf) . $csvdata ; // adds the BOM to the file  
header("content-type: application/csv-tab-delimited-table; charset=utf-8");  
} else {  
header("content-type: application/csv-tab-delimited-table;");  
}
```
