Description

When using right click in the RTE nothing happens.

Seems to be caused by the ExtJS removal: [#52877](#)

- Description updated

- Status changed from New to Needs Feedback

@Alexander Stehlik

Can you test it with an empty RTE? I've tested it on 8.5.0 and the RTE context menu is present, but misplaced.

I think that the related issue is this one <https://forge.typo3.org/issues/78001> which has been solved only for 7.6 as far as I can see

#2 - 2017-01-10 23:13 - Alexander Stehlik

- File screenshot_rte.png added

I just tested it again. The menu opens again but there is a new problem:

It is displayed way below the editor and can hardly be reached (see attached screenshot).

Edit: Tested in Chrome and Firefox.

#3 - 2017-01-10 23:26 - Riccardo De Contardi

- Subject changed from RTE right click context menu does not work any more to RTE right click context menu appears misplaced, below the editor by far and hardly reachable

- Status changed from Needs Feedback to New

As I said, it could be a revamp of this one: [#78001](#) (but I don't know exactly, maybe that's not related, even if the effects seems the same)

#4 - 2017-08-30 12:05 - Riccardo De Contardi

- Status changed from New to Closed

Closing. This does not affect anymore TYPO3 8, and seems already solved for version 7.6.

If you experience the issue again with version 7.6 please reopen it or open a new issue with a reference to this one;

If you still need it for version 8, where RTEhtmlarea has been removed, open an issue on <https://github.com/FriendsOfTYPO3/rtehtmlarea> if you still experience the issue. Thank you.
