Revision d0387144 - 2017-01-09 19:35 - Andreas Fernandez

[!!!][FEATURE] Allow reloading of backend topbar

A new API is introduced that allows to reload the backend’s topbar. The reload may be triggered via JavaScript and PHP.

As the registered events of the toolbar items within the topbar get lost after reloading, the event registration for these toolbar items needs some adoption.

The topbar is now reloaded in case of:
- updating the user’s avatar
- after configuring an extension
- opening the EXT:belog module from the System Information menu

Resolves: #79196
