#### Description

While making an old extension work in TYPO3 7.6 and 8, I found that behavior of the AbstractTreeView has changed between 7.6.

The description of the variable \$makeHTML is outdated, as it describes a configuration option no longer existing:

```
/**
 * If TRUE, HTML code is also accumulated in ->tree array during rendering of the tree.
 * If 2, then also the icon prefix code (depthData) is stored
 *
 * @var int
 */
public $makeHTML = 1;
```

The variable is treated as a boolean since 7.6, the mentioned value of "2" does not have any effect, so the affected line should be removed.

Ideally, the variable should be converted to a boolean. But as it's a public variable, I assume this would be considered a breaking change, so please let me know if I should provide a patch set for that, too.

[BUGFIX] Remove outdated PHPDoc comment

The described behavior has been removed with TYPO3 7.6;  
the variable is treated as a boolean now.

Resolves: #79314

Releases: master
