

TYPO3 Core - Task #79515

Wrap doesRecordExist in new method

2017-01-27 11:50 - Thomas Hohn

Status:	Closed	Start date:	2017-01-27
Priority:	Should have	Due date:	
Assignee:	Thomas Hohn	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	Candidate for patchlevel	Complexity:	
TYPO3 Version:	8	Sprint Focus:	Stabilization Sprint
PHP Version:	7.0		
Tags:			
Description			
<p>At several places in the Datahandler class a call to doesRecordExist is followed immediately with a call to BackendUtility::getRecordWSOL which then fetches the record. Instead we wrap the functionality from doesRecordExist into a new method that returns the row - with all the permissions checks performed. Instead of calling BackendUtility::getRecordWSOL we add a new method recordInfoWithPermissionCheck which returns the row instead of just true/false if the record exists and is accessible. Afterwards the row is processed with a new method getRecordWSOLWithRow which processes the just newly processed row.</p> <p>This makes the flow simpler and saves an sql-query - which will give a performance enhancement when copying big sub-trees in the TYPO3 backend.</p>

Revision e22a32e7 - 2017-06-20 09:08 - Thomas Hohn

[CLEANUP] Wrap doesRecordExist in new method

Wraps the functionality from doesRecordExist in a new method recordInfoWithPermissionCheck.

The goal is a general cleanup and avoid unnecessary calls to the database in the case where the actual record is re-fetched from the database for processing just after a doesRecordExist call.

Resolves: #79515
Releases: master, 8.7

Revision dbe425f9 - 2017-06-30 17:36 - Oliver Hader

[BUGFIX] Copying workspace version record fails

Copying workspace version records fails in Doctrine DBAL exception due to using computed properties directly in the database - which do not exist. This misbehavior has been introduced in issue #79515 which switched to use BackendUtility:workspaceOL() without further sanitization.

Resolves: #81747
