[BUGFIX] Make styles.content.get available after major FSC rewrite

Since the major rewrite of EXT:fluid\_styled\_content and EXT:css\_styled\_content the following TypoScript setup must be loaded by default:

- `styles.content.get` can be used as ready2use `CONTENT` object for `colPos = 0`
- `tt\_content.default` outputs necessary info in the frontend, if the CType has currently no rendering definition

Both can be used independently from FSC or CSC.

Including the necessary TypoScript via `addTypoScriptSetup()` takes care of loading it before any other activated extension.

Resolves: #80044

### #8 - 2017-03-01 09:12 - Andre Koller

Patch doesn't work for me.  
I'm getting a blank page.

my setup:

```
lib.field_content0 < styles.content.get
lib.field_content0.select.where = colPos = 0

page = PAGE
page {
    10 = FLUIDTEMPLATE
    10 {
        file.stdWrap.cObject = CASE
        file.stdWrap.cObject {
            key.data = pagelayout
            default = TEXT
            default.value = typo3conf/ext/bootstrap_distribution/Resources/Private/Templates/standard.html
        }

        layoutRootPath = typo3conf/ext/bootstrap_distribution/Resources/Private/Layouts/
        partialRootPath = typo3conf/ext/bootstrap_distribution/Resources/Private/Partials/

        variables {
            content0 < lib.field_content0
        }
    }
}
```

@Andre Koller

Can you check if you got stuck into this scenario: <https://forge.typo3.org/issues/79760> ? (Just a wild guess...)

### #10 - 2017-03-01 09:38 - Markus Klein

@Andre: Please post feedback to patch to Gerrit directly. Use your typo3.org Username to login and click the "Reply" button in the header area.  
Thanks.

### #11 - 2017-03-01 10:06 - Andre Koller

@Riccardo De Contardi

Thank You.

Patch ist working, but layout name "Default" collided with FSC layout name.  
See <https://forge.typo3.org/issues/79760>
