Description

In a project I have the following cropping configuration in TCA of "sys_file_reference":

```
$GLOBALS['TCA']['sys_file_reference']['columns']['crop']['config'] = [
    'type' => 'imageManipulation',
    'ratios' => [
        '2' => '2:1',
        '0.5' => '1:2',
        '3' => '3:1',
        '0.3333333333333333' => '1:3',
        '1.7777777777777777' => '16:9',
    ],
];
```

I do not have any cropvariants defined. According to the docs of cropvariants this configuration should still work.

If I update to commit "b534440e8bd789a1b1f3e84e2e173262094fa836" or later ([#79997](#)), I receive a fatal error in the BE:

```
#1351584844: An argument "key" or "id" has to be provided (More information)
```

```
TYPO3Fluid\Fluid\Core\Exception thrown in file
.../typo3_src/typo3/sysext/fluid/Classes/ViewHelpers/TranslateViewHelper.php in line 140.
```

If I reset the example in "typo3/sysext/backend/Resources/Private/Templates/ImageManipulation/ImageManipulationElement.html", it works as before ...

[BUGFIX] Do not allow dots in ratio IDs

Due to usage of Fluid dynamic variable parts in the template, ratio IDs must not contain a "."
