Description			
There is no official documentation about extbase's switchableControllerActions for flexform.			
<ul style="list-style-type: none">• http://blog.teamgeist-medien.de/2014/02/typo3-extbase-standard-action-per-flexform-festlegen-switchablecontrolleractions.html• http://blog.teamgeist-medien.de/2014/02/typo3-extbase-standard-action-per-flexform-festlegen-switchablecontrolleractions.html			
The docs then should mention that			
<ul style="list-style-type: none">• the first action is used at first• all allowed actions must be listed comma-separated• extension of the plugin with new actions requires re-saving of all tt_content plugin instances

- Related to Epic #88528: Remove switchable controller action functionality added

#2 - 2019-11-09 20:08 - Sybille Peters

Documentation has been recently added:

- for [FlexForms](#) (in "TYPO3 Explained")
- for [switchableControllerActions](#) (in Extbase / Fluid book)

Please check if the documentation there is sufficient. If not, please try to improve it or open an issue in the repository on GitHub (improving it is preferred). (However, switchableControllerAction is soon to be deprecated, I would not invest any time in documenting this particular feature, see <https://forge.typo3.org/issues/88528>)

See information:

- "Contribute to docs": <https://docs.typo3.org/m/typo3/docs-how-to-document/master/en-us/WritingDocsOfficial/Index.html>
- "How to find issues (for documentation repos)": <https://docs.typo3.org/m/typo3/docs-how-to-document/master/en-us/GitHub/Index.html#find-issues-for-a-specific-manual>

I would propose to close this issue.
