Description			
There are multiple issues with the special fields "_REF_", "_CONTROL_", "_CLIPBOARD_", ...			
<ul style="list-style-type: none">• in DatabaseRecordList::fieldSelectBox there are special fields defined, but your selection can't be respected as AbstractDatabaseRecordList::generateList only respects 2 of them.• The special <i>CONTROL</i> do not need to be in the list as DatabaseRecordList::getTable add it anyway (and is maybe later removed if noControlPanels)• The special <i>REF</i> is only added if "dontShowClipControlPanels" is not true, which makes no sense (this attribute is true if you select something else then normal clipboard)<ul style="list-style-type: none">◦ In 6.2 it also depended on MOD_SETTINGS["bigControlPanel"] why it was more or less always on unlike in v7/8• The special <i>CLIPBOARD</i> is automatically set if showClipboard is true, so also do not need to be in the list of DatabaseRecordList::fieldSelectBox

Associated revisions

Revision 96e6bba9 - 2020-08-30 16:50 - Daniel Windloff

[BUGFIX] DatabaseRecordList: Field selection in single table view

The following items have been removed as they haven't any impact:

- ` _LOCALIZATION_ `
- ` _CLIPBOARD_ `
- ` _CONTROL_ `

` _LOCALIZATION_ ` and ` _CLIPBOARD_ ` are always filtered out.
` _CONTROL_ ` is always added, if not selected in the field selection.

Furthermore, the `ctrl` values `tstamp` and `crdate` could be added by any user regardless of the column name (respecting the configuration in TCA).

Finally, the column showing the references is added, if selected.

Releases: master, 10.4

Resolves: #80396
