Target version:	
Has patch: No	
Description	
The fix to bug #76292 introduces this bug.	
It's critical when using the extension sr_email_subscribe with a choice of newsletter categories.	
In Classes\Domain\Data.php, the function updateMMRelations expect the MM tables to have a field "fieldname". It's not the case with the sys_dmail_ttaddress_category_mm or sys_dmail_feuser_category_mm for example, causing the following error: Unknown column 'fieldname' in 'field list' The function construct this query: INSERT INTO sys_dmail_ttaddress_category_mm (uid_local,tablenames,fieldname, sorting,uid_foreign) VALUES (...)	
I gess there should be a check on the structure of the MM table before the creation of the insert array (line 1525 and following)

[BUGFIX] Error in updateMMRelations with direct mail categories

Problem: In SJBR\SrFeuserRegister\Domain\Data.php, the function updateMMRelations expects the MM tables to have a field "fieldname". It's not the case with sys_dmail_ttaddress_category_mm or sys_dmail_feuser_category_mm.

Solution: Check MM_match_fields configuration in TCA.

Resolves: #80409
