Description			
As for the result of the polls [1], the method \TYPO3\CMS\Core\TypoScript\TemplateService::getTypoScriptSourceFileContent should also check for .typoscript in addition to .txt and .ts. The the long run, files should be registered individually instead of the magic resolving in the core.

Revision 09a61027 - 2017-05-17 11:48 - Andreas Allacher

[FEATURE] Introduce .typoscript file extension

The new file extension .typoscript will be the default for TypoScript configuration files and is the only recommended one from now on. This effort is made to introduce a dedicated file extension for TypoScript configuration files, and to avoid conflicts with already existing and more spread file extensions like ".ts" for TypeScript or Video Transport Stream Files.

Resolves: #78161
Resolves: #80689
Releases: master, 8.7
