#### Description

Dear TYPO3-Team,

by changing to the new RTE-Editor I found a problem with quotationmarks. The typed " does not encoded to &quot; (see Screenshot). The green one was formatted by the old RTE and afterwards quotes where replaced by stdWrap.replacement in „ resp. “. The yellow marks are formatted by the ckeditor. It is still an inch-mark.

Please have a look at it. It is quite important for correct typography in the web.

Thank you for your work  
Martin

#### History

- Status changed from New to Needs Feedback

Hi and sorry for the late answer; I suggest you to add the CKEditor "autocorrect" add-on that adds exactly the feature you asked for, out of the box (plus some more :)

Refences:

<https://github.com/danyaPostfactum/ckeditor-autocorrect-plugin>

<https://typo3worx.eu/2017/05/extend-typo3-ckeditor/>

Could you tell us if it is sufficient for you? Thank you!

- Status changed from Needs Feedback to Closed

- Target version deleted (next-patchlevel)

No feedback since the last 90 days => closing this issue.

If you think that this is the wrong decision or that there is still work that should be done on this topic, please reopen it or open a new issue with a reference to this one. Thank you.

Thank you and best regards
