Description			
Hello All,			
Just installed a blank TYPO3 8.7.1 package and when I try to add text with image content element, I get this. As as result of this I could not see any textarea.

Just to give an update regarding this issue. I tried the same packages in 2 more sever having some more response time than previous one. There everything fine. So I reckon when there is slow server less response time, there is a problem with CK editor.
