Description

If you add an extra plugin and configure it in the section

```
editor:  
  config:  
    <pluginname>:  
      <pluginoption>:
```

the configuration of the plugin in a preset is not taken into account.

Reason is that currently the configuration of the plugin overwrites the values of the output of "prepareConfigurationForEditor".

Solution is to check, whether there are values in both array. If so merge or overwrite the configuration for the editor, depending on the combination.

I will provide a patch and a extension on github to test it.

Revision 63699280 - 2018-03-15 12:01 - Marcus Schwemer

[BUGFIX] Accept configuration for external plugins from presets in ckeditor

Currently the default configuration of an external plugin is always used for the configuration. This patch takes care of a proper merging of the configuration.

The configuration of the extension is taken as default. If a custom configuration in a preset is available, both configurations will be merged.

Resolves: #81263

Releases: master,8.7

- Status changed from Resolved to Closed

#13 - 2019-05-14 18:20 - DANIEL Rémy

This change introduced an issue: <https://forge.typo3.org/issues/88302>

#14 - 2019-05-14 18:25 - DANIEL Rémy

I'm wrong, the issue described in [#88302](#) still exists without the change introduced here.
