#### Description

Hi,

the pagebrowser is not working. Has anyone a similar problem?

For example:

I get 50 results and on each page 10 results are displayed. When I want to see my search results of page 2 and I click the link to go to page 2 then it does not switch to page 2 but stays at page 1.

I am using TYPO3 8.7.0, PHP 7.1 and indexed\_search 8.7.0

Thanks for your help :)

#### History

##### #1 - 2017-05-22 12:20 - Katharina Hasselbach

- PHP Version changed from 7.0 to 7.1

##### #2 - 2017-05-22 12:22 - Katharina Hasselbach

Please do not assign tickets to anyone. Thanks.

##### #6 - 2017-05-27 22:30 - Riccardo De Contardi

- Category set to Indexed Search

##### #7 - 2017-12-20 04:07 - Dirk Klimpel

I had the same problem with a second search form on the page.

Like here: [http://www.typo3-probleme.de/2016/04/29/typo3-7-6-indexed\\_search-template-auslagern-und-erweitern-1804/](http://www.typo3-probleme.de/2016/04/29/typo3-7-6-indexed_search-template-auslagern-und-erweitern-1804/)

I have deleted "search[pointer]" from the second form.

- Status changed from New to Needs Feedback

Sorry for this very late answer;

Is this issue still reproducible? I performed a short test with 8.7.19 failing to reproduce it: the switch between page 1 and page 2 of the search results seems to work.

I also try adding two plugins on the same page, but again, everything seems to work.

Can you write more detail about your setup and the steps necessary to reproduce the issue? Thank you!
