<b>Category:</b> Backend User Interface	<b>Estimated time:</b> 0.00 hour
<b>Target version:</b> 9 LTS	<b>Complexity:</b> medium
<b>PHP Version:</b>	<b>Sprint Focus:</b>
<b>Tags:</b>	
<b>Description</b> Similar to the "Save and view page" feature which can be enabled for custom records via <a href="#">the preview feature</a> , viewing records from the list module should be possible too. It could use the very same configuration for preparing the preview URL. Currently this behavior is supported for pages only.	
<b>Related issues:</b> Is duplicate of TYPO3 Core - Feature #77581: List module: Add preview button ... <b>New</b> <b>2016-08-22</b>
