Description

The TCEMAIN.preview setting generates a link without chash so the opened page throws an error (&cHash empty)

Configuration:

```
TCEMAIN.preview {
    tx_news_domain_model_news {
        previewPageId = 98
        useDefaultLanguageRecord = 0
        fieldToParameterMap {
            uid = tx_news_pil[news]
        }
        additionalGetParameters {
            tx_news_pil.controller = News
            tx_news_pil.action = detail
        }
    }
}
```

closing it as duplicate of [#78336](#)

see <https://review.typo3.org/#/c/50264/> for a patch, would be great if you could test that.
