<b>Description</b>	
As soon as the first object in the a TypoScript configuration has dot notation, the the next line will not be indented. E.g.:	
<pre>plugin.tx-rest { # dot notation settings { # second line will not be indented aliases{} # third line will be indeted again paths {} [...] }</pre>	
Whereas this works fine:	
<pre>plugin { tx_rest { settings {} aliases {} } }</pre>
