#### Description

### Edit 1:n FF: Hotels "[Translate to German:] A" on page "irre"

General **Visibility**

**Title:**

[Translate to German:] A

A

**Offers:**

+ Create new

**Translation behavior**

Custom value  Value of default language

+ Create new  Localize all records  Synchronize with original language

If allowLanguageSynchronization is active for inline child elements, the "create new" buttons and any other interaction shall be disabled for localized parent records - since these child records. Otherwise there's the possibility to create inconsistent and non-synchronized scenarios.
