Description

If I use flexform and following code:

<TCEforms>
<label>Subtitle</label>
<config>
<type>text</type>
<cols>48</cols>
<rows>5</rows>
<enableRichtext>1</enableRichtext>
</config>
</TCEforms>

custom yaml configuration of cke is not loaded.

Revision d44e84fc - 2019-06-19 08:42 - Benni Mack

[BUGFIX] Use proper configuration when processing FlexForms in DataHandler

This change removes the "TCEforms" option when parsing
FlexForms data in DataHandler, when dealing with FlexForms
that contain sheets.

This way, FlexForms RTE configuration is properly set
and no double spacings for linebreaks are used.

According to the issue, this only happened when
fields specifically within sheets are configured,
for fields without sheets, this has been working
already.

In order to ensure both cases are working, tests
are applied for both variants.
