Description

I get the following error after searching in "Filelist" in backend:

```
ADODB could not run this query: SELECT "uid", "pid", "missing", "type", "storage", "identifrier", "
identifrier_hash", "extension", "mime_type", "name", "sha1", "size", "creation_date", "modification
_date", "folder_hash" FROM "sys_file" WHERE "folder_hash" IN ('ea02c4cccc1470fc0b3c63b26269de13c0f9

schluss%" AND "missing" = 0
```

After tracing it a bit, the incorrect query seems to be built by escaping the searchword:

```
ILIKE "%Beschluss%"
```

should be

```
ILIKE '%Beschluss%'
```

to get the query working!

History

#1 - 2017-07-13 07:37 - Georg Ringer

- *Status changed from New to Closed*

please update to 8 which uses doctrine and the query should be fine there. nothing will be done in that regard in 7.

#2 - 2017-08-18 11:00 - Dan Untenzu

Could you please re-open the issue?

I understand that the core team wont put any effort in fixing this bug, since we have Doctrine in version 8 now. But I would like to express refusal that a ticket is closed with the advice to upgrade to some newer TYPO3 version. Version 7 is still a supported LTS version. If by any means somebody experiences the same bug or even has a solution, than this issue *may* be fixed.
