Description			
<p>I wondered if it is possible to rotate Images - but it seems like it is not yet available.</p> <p>There is a bug around that Image Manipulation should not be done on upload (Bug #69274) - but we have an "Image Manipulation Wizard" now, this should be capable of rotating Images, too.</p> <p>I have had already some editors complaining that uploaded images do not have the right rotation anymore, and at the moment it is not easy possible to readjust the misrotated images.</p> <p>If someone points me to the right direction I could dig into this further.</p>
