Description

see <https://www.golem.de/news/certificate-transparency-hacking-web-applications-before-they-are-installed-1707-129172.html>

Steps for TYPO3

- TYPO3 creates FIRST_INSTALL.php (name to be discussed) file on first request with some random token
- admin has to open that file and copy&paste the token to the Install Tool
- only the created session with the correct token in the step-installer allows to take further actions

History

#1 - 2017-07-29 16:46 - Helmut Hummel

create FIRST_INSTALL file on first request with some random token

By default this file is in document root, which means it can be downloaded

#2 - 2017-07-29 17:29 - Oliver Hader

- Description updated

#3 - 2017-07-29 17:31 - Oliver Hader

True. I adjusted the description which is of course still topic to be discussed and not the "final list".

#4 - 2017-08-10 14:58 - Oliver Hader

- OTRS-Sec Ticket-ID set to 201704095760000011

#5 - 2017-08-22 16:35 - Benni Mack

we could rename it to ".FIRST_INSTALL"

#6 - 2017-08-24 18:13 - Oliver Hader

- Status changed from New to Accepted

As the article mentions that TYPO3 is not that bad compared to other CMS vendors - since we have the FIRST_INSTALL semaphore already in place - this is considered as feature for TYPO3 9.

#7 - 2017-12-14 15:26 - Oliver Hader

- Tracker changed from Bug to Feature

- *Project changed from Core Security to TYPO3 Core*

#8 - 2017-12-14 15:27 - Oliver Hader

Moved to public tracker since the article has been published anyway

#9 - 2017-12-14 15:27 - Oliver Hader

- *Category set to Install Tool*

- *Target version set to 9 LTS*

#10 - 2018-09-06 14:07 - Susanne Moog

- *Target version changed from 9 LTS to Candidate for Major Version*
