

Metadata and content analysis service - Bug #82066

Please check file for existence before starting the extractor

Target version:	1.5.2	PHP Version:	
TYPO3 Version:	7		
Description			
Hello,			
I have some sys_file records with flag missing=1. FileStorageExtractionTask calls findInStorageWithIndexOutstanding which will also return missing file records. In extractMetadataFromImage -> getMetaData you call			
<pre>\$exif = @exif_read_data(\$fileName);</pre>			
You have luck. It will not break and return false, but some lines below:			
<pre>if (function_exists('iptcparse') && getimagesize(\$fileName, \$imageinfo)) {</pre>			
This will break, because file does not exist.			
Can you please add a check for file existence very early before calling file related functions?			
Stefan
