Description

Hi, I have a flexform with some fields, one of they being this:

```
<category>
  <TCEforms>
    <label>LLL:EXT:cw_news/Resources/Private/Language/locallang.xlf:flexform.sNEWSFILTER.category</label>
    <config>
      <type>select</type>
      <renderType>selectTree</renderType>
      <size>10</size>
      <foreign_table>sys_category</foreign_table>
      <foreign_table_where>AND (sys_category.sys_language_uid = 0 OR sys_category.l10n_parent = 0) ORDER BY sys_category.sorting</foreign_table_where>
      <treeConfig type="array">
        <expandAll>true</expandAll>
        <parentField>parent</parentField>
        <appearance type="array">
          <showHeader>true</showHeader>
          <expandAll>true</expandAll>
        </appearance>
      </treeConfig>
      <autoSizeMax>10</autoSizeMax>
      <minitems>0</minitems>
      <maxitems>500</maxitems>
    </config>
  </TCEforms>
</category>
```

If I check a category and save, everything goes nice. But after saving, if I save again before the form is fully loaded (and the field not rendered yet), the data is lost.

- Status changed from New to Needs Feedback

What is the exact TYPO3 version you are using?

#3 - 2017-08-21 16:31 - José Ricardo

TYPO3 8.7.4

#4 - 2017-08-21 17:20 - Wouter Wolters

- *Status changed from Needs Feedback to New*

Ok, not the issue I was thinking of we fixed in one of the latest versions.

#5 - 2018-01-24 20:24 - Susanne Moog

- *Category set to FormEngine aka TCEforms*

#6 - 2019-10-29 15:36 - Tymoteusz Motylewski

- *Status changed from New to Resolved*

It should be already fixed, if not please reopen.
