

TYPO3 Core - Bug #82286

Additional Languages cannot be downloaded via Languages Module

2017-09-04 15:11 - Marc Willmann

Status:	Closed	Start date:	2017-09-04
Priority:	Must have	Due date:	
Assignee:		% Done:	0%
Category:	Language Manager (backend)	Estimated time:	0.00 hour
Target version:		Complexity:	
TYPO3 Version:	8	Is Regression:	Yes
PHP Version:	7.0	Sprint Focus:	
Tags:	language l10n user settings		
Description			
clean install of TYPO4 8.7.4 (via composer). After finishing the InstallTool go to module "Language" and activate and download any language (2x success message and download bar is 100%), then go to user settings and try to choose the selected language from the selectbox - there isn't any language.			
the directory typo3conf/l10n/ is empty - if you copy the expected files in this folder, the language selection is working.

History

#1 - 2017-09-04 15:15 - Wolfgang Wagner

Same problem here in 8.7.4 and 8.7.3

#2 - 2017-09-04 15:41 - Marc Willmann

Seems to be a TER issue...

-> <https://git-t3o.typo3.org/t3o/ter/issues/207>

#3 - 2017-09-04 16:51 - Alex Kellner

Same on our systems (8.7.4)

At the moment we symlinked typo3conf/l10n/de to the previous deployed version and cleared caches. All work as expected.

#4 - 2017-09-05 15:53 - Tilo Baller

Same here with 8.7.5 (composer mode).

Only language files of some extensions (tt_address and realurl) are downloaded.

#5 - 2017-09-05 16:27 - Clemens Tilgner

It does not work on 7.6.x and 6.2.x.

On 6.2.x System, you get at least a failure message in the language module.

#6 - 2017-09-07 15:24 - Stephan Großberndt

#8 - 2017-09-07 17:33 - Helmut Hummel

- Status changed from New to Resolved

Since this wasn't a bug in TYPO3 but related to infrastructure, this can be closed now.

Language files are now available and regular update of these will be configured shortly
