By sacrificing just two features:

- Having $this->controllerContext set in ViewHelpers automatically
- Supporting render method arguments

It is possible to remove a significant number of ViewHelper base class overrides.

**Revision 533a1a34 - 2017-12-05 20:36 - Claus Due**

[!!!][TASK] Remove CMS base ViewHelper classes

This patch sacrifices two features:

- Having $this->controllerContext on ViewHelpers
- Support for render method arguments

And by doing so, allows the removal of every CMS base ViewHelper class and several overrides they implement. The base classes are still available as class aliases to limit the breaking change to the two features mentioned above.
