[FEATURE] Introduce new @import syntax for TS includes

The original '<INCLUDE_TYPOSCRIPT...>' syntax is hard to understand, error-prone and overloaded with features.

This patch introduces a new way to include files based on SymfonyFinder and simple logic to allow to include files or folders:

The following syntax (leaned towards SASS imports) is added:
Imports one file:

```
- @import 'EXT:myext/Configuration/TypoScript/myfile.typoscript'
```

Imports all files in a folder (always sorted by name):

```
- @import 'EXT:myext/Configuration/TypoScript/**'  
- @import 'EXT:myext/Configuration/TypoScript/'
```

Imports all files ending with ".typoscript":

```
- @import 'EXT:myext/Configuration/TypoScript/*.typoscript'
```

Automatically adds '.typoscript' file ending and includes setup.typoscript

```
- @import 'EXT:myext/Configuration/TypoScript/setup'
```

This is all done with Symfony Finder to find the files.

Resolves: #82812

Releases: master
