[FEATURE] Replace @inject with @TYPO3\CMS\Extbase\Annotation\Inject

This patch introduces the usage of doctrine annotations.
Therefore the AnnotationRegistry is configured during the bootstrap and the annotation "TYPO3\CMS\Extbase\Annotation\Inject" is evaluated when building a ClassSchema for a class.

On top of that this patch puts the static variable $ignoredTags into the DocCommentParser class, which saved quite some bytes of RAM when reconstituting the ClassSchema objects from the cache.

Resolves: #82869
Releases: master
