#### Description

In case a TCA field uses allowLanguageSynchronization (or l10n\_mode=exclude) for table pages\_language\_overlay, dependencies (localizations of the initial record) are processed that point to the according pages\_language\_overlay. However pages\_language\_overlay records cannot be localized further, they always depend on a single pages record which is the record of the default language.

In case the backend is used as non-admin user that has a language restriction ("Limit to languages" in backend groups/users settings), an error message is shown:

```
[newlog()] recordEditAccessInternals() check failed. [ERROR: Language was not allowed.]
```

In TYPO3 v8, all pages\_language\_overlay records are selected which match the condition pages\_language\_overlay.pid = pages\_language\_overlay.uid (pid is used as transOrigPointerField). In TYPO3 v9 this changed since pages\_language\_overlay has been migrated into pages having a distinct transOrigPointerField in l10n\_parent.

[BUGFIX] Fix allowLanguageSynchronization on pages\_language\_overlay

In case a TCA field uses allowLanguageSynchronization (or l10n\_mode=exclude) for table pages\_language\_overlay, dependencies (localizations of the initial record) are processed that point to the according pages\_language\_overlay. However pages\_language\_overlay records cannot be localized further, they always depend on a single pages record which is the record of the default language.

In case the backend is used as non-admin user that has a language restriction ("Limit to languages" in backend groups/users settings), an error message is shown:

```
[newlog()] recordEditAccessInternals() check failed.  
[ERROR: Language was not allowed.]
```

In TYPO3 v8, all pages\_language\_overlay records are selected which match the condition pages\_language\_overlay.pid = pages\_language\_overlay.uid (pid is used as transOrigPointerField). In TYPO3 v9 this changed since pages\_language\_overlay has been migrated into pages having a distinct transOrigPointerField in l10n\_parent.

Resolves: #83001

Releases: 8.7
