

## TYPO3 Core - Task #83727

Epic # 83894 (Closed): PSR-15 Initiative

### Reimplement EXT:redirect as PSR-15 middleware

2018-01-29 21:17 - Benjamin Franzke

<b>Description</b> The redirect handling is a perfect usecase of PSR-15 middlewares.  Redirect handling wants to a) prevent the regular frontend rendering and b) return an own response. c) in case a no redirect matches it want's the regular RequestHandler to be invoked.  a) is doable by not invoking the RequestHandler a middleware gets passed by parameter b) is simple by simply returning an own PSR-7 Response c) is the standard case for a middleware.

[TASK] Rewrite the redirect handler as PSR-15 HTTP middleware

The code is restructured to clearly distinct between aborting the middleware chain – returning an own response – and forwarding the request to the next middleware/request handler.
