<b>Description</b>			
Hello there,			
The "Back" Button of the form confirmation step doesn't seem to work with 8.7.8 and Firefox. When you click it, nothing happens. The form is a standard 2 page setup, page one with a handful of fields, page two for confirmation.

Hi,  
our project went already live without confirmation page, but I'll have another look next time a customer wants that feature. Thanks for fixing it.
