Description

The middlware's introduced in https://review.typo3.org/c/55537/ did not preserve the sequence as used before.

timetracker has been marked to be executed after the preprocessing:

```
'typo3/cms-frontend/timetracker' => [
    'target' => \TYPO3\CMS\Frontend\Middleware\TimeTrackerInitialization::class,
    'after' => [
        'typo3/cms-frontend/preprocessing'
    ]
]
```

'timetracker' needs to be executed first, then the request 'preprocessing', as done before the mentioned change:

```
// Starting time tracking
$configuredCookieName = trim($GLOBALS['TYPO3_CONF_VARS']['BE']['cookieName']) ?: 'be_typo_
user';

/** @var TimeTracker $timeTracker */
$timeTracker = GeneralUtility::makeInstance(TimeTracker::class, ($request->getCookieParams
()[$configuredCookieName] ? true : false));
$timeTracker->start();

// Hook to preprocess the current request
foreach ($GLOBALS['TYPO3_CONF_VARS']['SC_OPTIONS']['tslib/index_ts.php']['preprocessReques
t'] ?? [] as $hookFunction) {
    $hookParameters = [];
    GeneralUtility::callUserFunction($hookFunction, $hookParameters, $hookParameters);
}
```

Revision 5515ba25 - 2018-02-07 22:17 - Benjamin Franzke

[BUGFIX] Fix timetracker and pre-process middleware sequence

Correct middleware configuration to preserve the ordering
timetracker initialization and pre-process hook had prior
the re-implementation as middleware.
The timetracker initialization needs to be first, pre-process second.
