Description

We have different sizes of the email field at the database schema

- be_users.email => varchar(80)
- pages.author_email => varchar(80)
- tx_extensionmanager_domain_model_extension.author_email => varchar(255)
- fe_users.email => varchar(255)
- pages_language_overlay.author_email => varchar(80)

I think we should streamline all email fields to varchar(255)

[TASK] Streamline size of email fields

Change email field definition to 255 characters for the rfc compatibility.
Extend the TCA max option, too.

can you do a patch for that? remember that 9 does not need any change in *pages_language_overlay* anymore.
