Target version:		Complexity:	
TYPO3 Version:	9	Is Regression:	
PHP Version:		Sprint Focus:	
Tags:			

Description

Will probably happen in TYPO3 8 and 9, I am only testing with current master (9.2.0-dev)

Steps to reproduce

1. Use a fresh install or reset your user settings: Click on user name in top : "user settings" : "Edit and Advanced functions" : "Reset user settings to default state"
2. Go to a page where invalid links exist
3. Info: Linkvalidator: "Check links"
4. Look at the report:

Actual results

By default none of the links types will be checked in the report. However, invalid links are shown in the list.

Also, if you click only on "Internal Links" type checkbox, then on refresh, deselect the checkbox again, refresh, this does not work correctly.
