[TASK] Use PSR-7 request params in viewpage module

Since changeset I3020aa7a9cfd92d4b96afd4d4044979a771db5b the viewpage module is a native PSR-7 controller, therefore GeneralUtility\_GP() and getIndpEnv() should no longer be used.

Restructure the code to use strict typing (to prevent type casting all over the code), unify naming (\$pageld and \$languageld), and to prevent calculating \$targetUrl twice.

Releases: master

Resolves: #84015
